

MINI COOPER FRONT DYNAPRO 6 BIG BRAKE KIT

Models Covered:

- 2002 - 2013 Mini Cooper (Except Countryman)
- 2002 - 2013 Mini Cooper "S"
- 2007 - 2015 Mini Cooper Convertible (4 lug wheels)
- 2012 - 2015 Mini Cooper Coupe/Roadster

Kit Features:

- Upgrade from OE calipers to aluminum DynaPro six piston calipers.
- Choose 12.88" diameter GT slotted or SRP drilled and slotted rotors.
- Fully compatible with ABS and OE master cylinder output.
- Simple bolt-on installation with no modifications required.

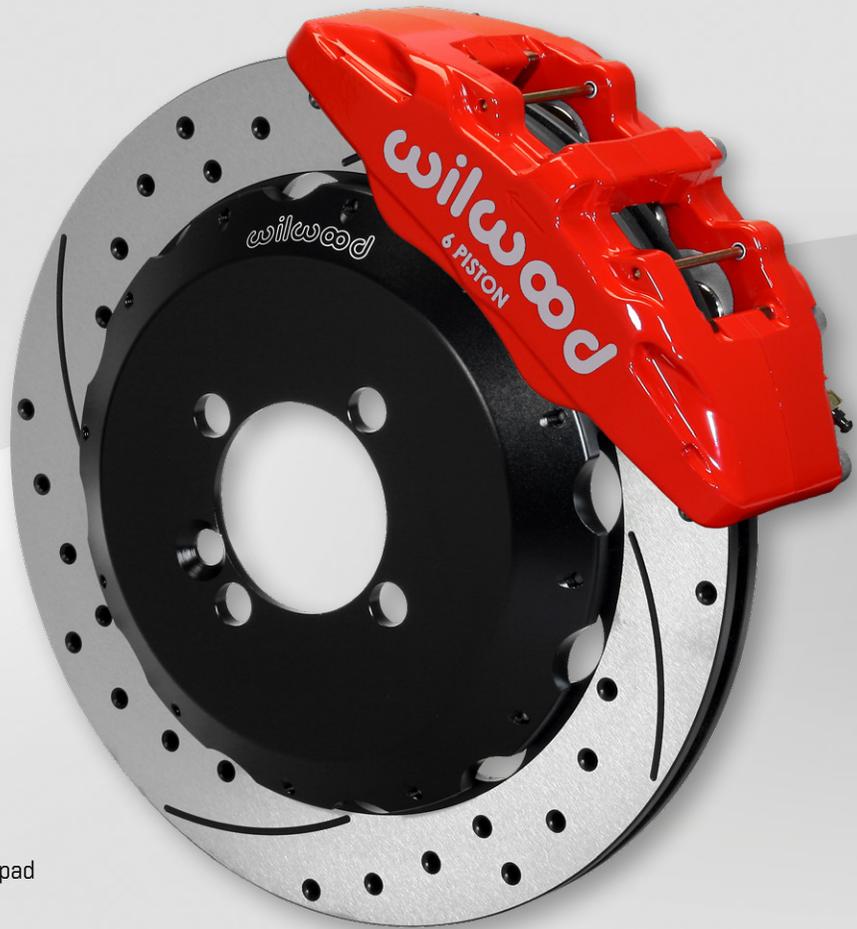

Component Features:

DynaPro 6 Forged Billet Lug Mount Calipers

- Machined forged billet DynaPro 6 calipers provide a 14% increase in pad area compared to our DynaPro four piston models.
- Six differential bore stainless steel pistons generate big clamping power with balanced pad loading for even wear in high demand braking applications.
- Stainless steel pistons resist corrosion while slowing heat transfer rate from the pads to the fluid and seals.
- Internal piston seal-in-bore design adds proven durability, keeping the fluid in and dirt out without the need for external boot seals.
- Brake fluid resistant powder coated in black, red, or 22 other custom colors with Wilwood logo.

12.88" x 0.81" Curved Vane GT or SRP Rotors

- Rotors cast with 48 curved directional vanes to circulate cooling air internally.
- GT rotors feature full detail machining with asymmetrical slots in the faces to provide durability and longer life under repeated hard braking and high temperature use.
- SRP rotors feature a drilled and slotted face with a durable E-coat finish which seals the casting and prevents corrosion.
- Fits most 17" or larger wheels.

Forged Aluminum GT Mounting Hats

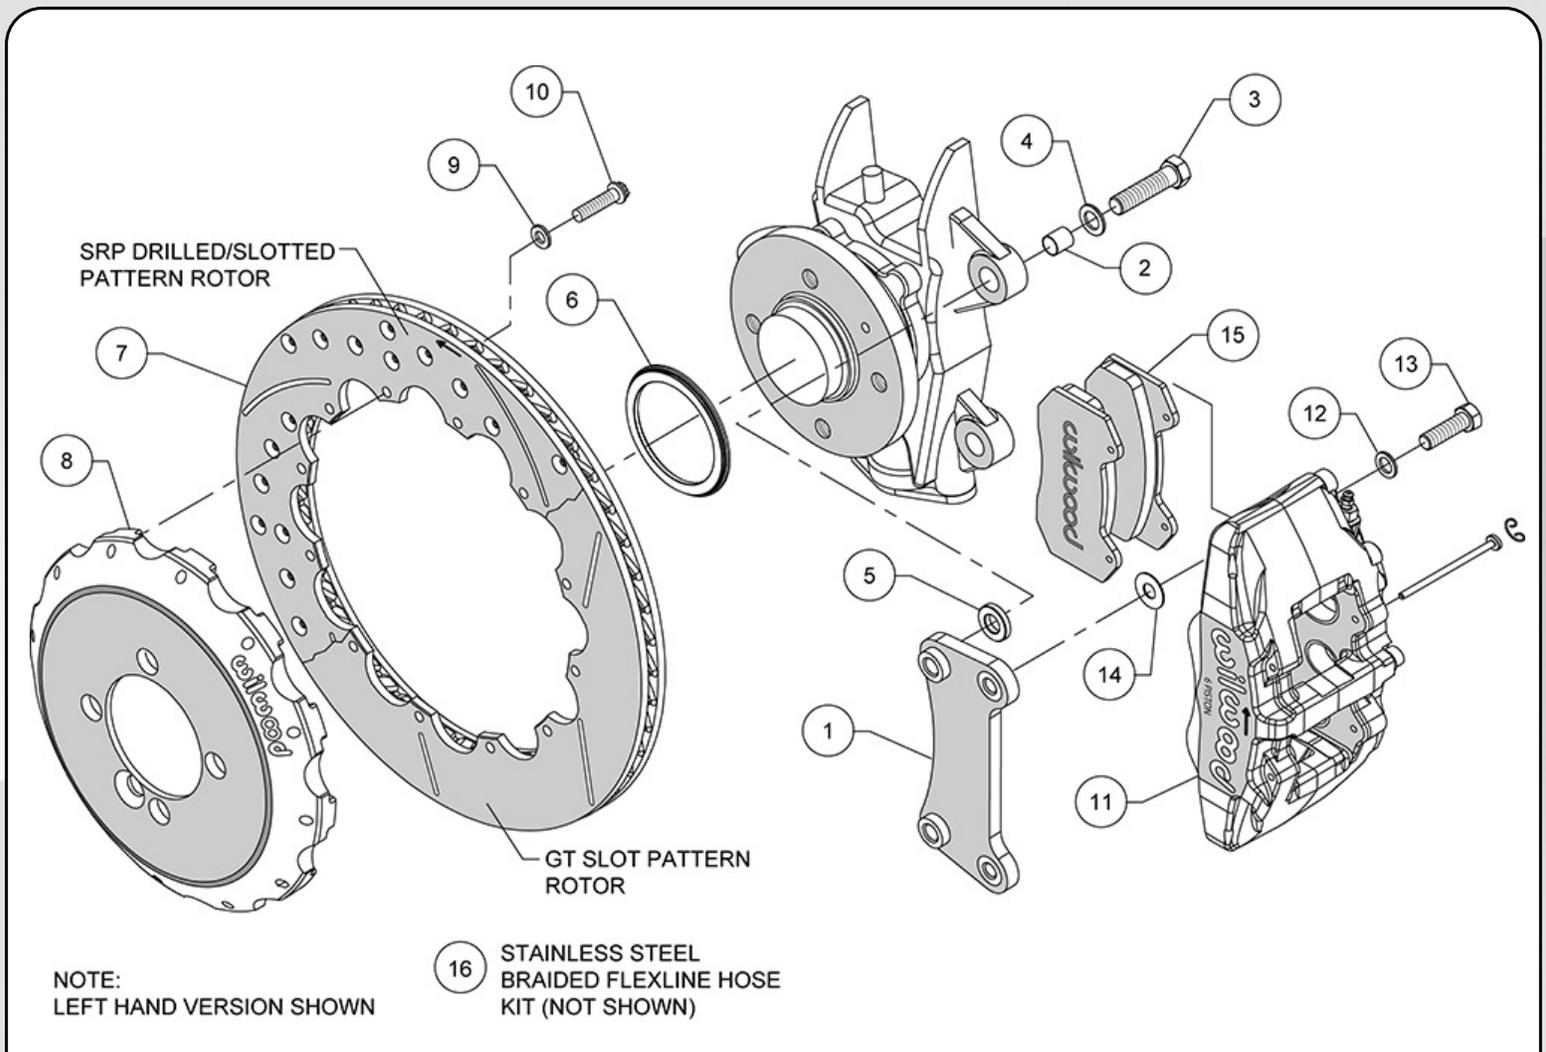

- Forged aluminum rotor hats reduce weight yet handle extreme brake torque delivered by the DynaPro 6 calipers.
- Black E-coat finish resists corrosion while looking great inside the wheel.

Smart Pad BP-10 Brake Pads

- Wilwood's BP-10 Smart Pad is a unique composite-metallic compound with increased friction and high fade resistance in a quiet low-dust pad.
- Optional high-temp and race only pad compounds are also available.

Brackets, Hardware and Plumbing

- DOT approved jacketed braided stainless steel flexlines improve brake feel.
- Caliper brackets, alignment shims, and premium fasteners included in every kit.

PART NUMBER	DESCRIPTION
140-13062	Front Kit, Mini Cooper, DynaPro 6 Caliper, 12.88" GT Rotor, Black Caliper
140-13062-D	Front Kit, Mini Cooper, DynaPro 6 Caliper, 12.88" SRP Drilled and Slotted Rotor, Black Caliper
140-13062-R	Front Kit, Mini Cooper, DynaPro 6 Caliper, 12.88" GT Rotor, Red Caliper
140-13062-DR	Front Kit, Mini Cooper, DynaPro 6 Caliper, 12.88" SRP Drilled and Slotted Rotor, Red Caliper
